

If you are serious about safety and training, let our 25 years of experience providing licensed, Red Seal journeymen trainers help make you safer and more efficient.

How safe are you?

Take our short quiz....

- 1/ What distance must be maintained from overhead power lines in Alberta?
- 2/ When should a shackle be used on a crane hook?
- 3/ What is the minimum number of wraps required on a hoist drum in Alberta?
- 4/ When must running ropes (hoist cables) be taken out of service as far as broken wires are concerned?
- 5/ What is the minimum safety factor for wire rope & synthetic slings?
- 6/ How can you identify chain that can be used for overhead lifting?

Contact Crane Safety Ltd. to see how well you'd do...
